PROFESSIONAL PROFILE

Final-year Bachelor of Computer Science (Application Systems) student with strong foundations in backend development, structured application design, and cloud deployment. Skilled in C#, Java, SQL, and ASP.NET Core MVC. Recently completed the WeThinkCode_ Generative AI for Software Engineers programme, gaining practical exposure to AI-assisted development workflows and responsible AI practices. Committed to writing clean, maintainable code and building reliable systems.

TECHNICAL SKILLS

Programming

C# • Java • Kotlin (learning) • SQL

Frameworks & Technologies

ASP.NET Core MVC • Bootstrap 5

Databases

Azure SQL • Relational Database Design

Cloud & Tools

Microsoft Azure • Git • GitHub • Visual Studio • VS Code

AI & Development Practices

AI-assisted development workflows • Prompt engineering fundamentals • Responsible AI practices

---

PROJECT EXPERIENCE

Cloud Development Project

GitHub: github.com/LEA-GO

Cloud-focused development project demonstrating structured project setup, deployment-oriented thinking, and disciplined version control practices. Designed with clarity and maintainability in mind, following clean coding standards and proper documentation practices.

Key Areas:
• Structured repository management
• Deployment-oriented workflow

• Clean project organisation
• Git version control

EDUCATION

Bachelor of Computer Science

Specialisation: Application Systems
IIE MSA (Emeris – Ruimsig)
2024 – Present

CERTIFICATION

Generative AI for Software Engineers

WeThinkCode_ • 2026

• AI-assisted development workflows
• Prompt engineering fundamentals
• Responsible AI practices
• Practical integration of Generative AI in engineering environments

---

PROFESSIONAL STRENGTHS

• Strong analytical and structured problem-solving ability
• High attention to data accuracy and system reliability
• Clear technical communication
• Ownership and accountability in project environments
• Adaptable and fast learner
